DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 5, drawn to a modified adenovirus that expresses only from orf 6 of E4 and has modified gene expression from E1A, and/or E1B, and/or other early/late gene products, classified in class 435, subclass 235.1.
- II. Claim 6, drawn to a method of inhibiting repair of breaks in ds DNA, classified in class 424, subclass 233.1.
- III. Claim 7, drawn to a method of preventing cancer, classified in class 424, subclass 93.1.
- IV. Claim 8, drawn to a method of treating cancer, classified in class 424, subclass 204.1.
- V. Claim 9, drawn to a method of preventing concatamerization of a linear wild-type adenoviral DNA, classified in class ⁴³⁵₁, subclass ^{91.1}_{***}.
- VI. Claim 10, drawn to a method of inhibiting V(J)D recombination, classified in class 435, subclass 440.
- VII. Claim 11, drawn to a method of preventing cell apoptosis induced by viral DNA replication, classified in class 435, subclass 456.
- VIII. Claims 12- 16, drawn to a method of increasing the efficiency chemotherapeutic or radiation treatment of cancer, classified in class 424, subclass 277.1.

Art Unit: 1648

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II- VII are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used for a variety of different treatments as shown by the different method claims.

Inventions II- VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventive methods are drawn to treating different cells (non-cancer, cancerous, or cancerous in combination therapy), different populations, different end results, and different conditions in need of treatment.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II- VII, and the methods of II-VII are all different, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1648

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
